

## California's Marine Protected Areas

California is making a difference with the creation of a statewide network of Marine Protected Areas (MPAs). Marine Protected Areas protect underwater habitats and species by prohibiting or limiting the removal of marine life. California's MPAs were established to protect every type of habitat found along California's coastline. The elephant seal colony at San Simeon is part of a Marine Protected Area.

Learn more about California's MPA network by visiting: [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa) and [www.californiampas.org](http://www.californiampas.org)
